MEDICAL TOURISM IN ROMANIA

State of the art technology. Experienced doctors.
Safe medical journey.

"It is an honor for us to actively promote Romania as a tourism destination. It is medical tourism that has steadily gained momentum - with a little pause during the pandemic - and is a business card for medical services providers for both the diaspora and the European citizens of other nationalities, and not only. The growing number of requests confirms that these facilities offer quality medical services at an optimum cost. And this is what we want to promote, Romania as a choice for health and wellbeing."

Cristian Hotoboc
PALMED President

Why choose Romania as a medical tourism destination?

- Romania has a private medical system that can offer high quality medical treatments and surgical interventions for a complete range of medical problems
- Currently, through a medical network of 68 private medical clinics and hospitals, we can provide to any foreign patient interested in medical care abroad
- Access to internationally certified doctors, super specialized in Europe and the US
- State of the art technologies in all areas of medicine and MRI complex investigations
- Full range of medical treatments from bariatric surgery, to eye surgery, plastic surgery, microsurgery, orthopedics, oncology, cardiology, neurology, IVF to full mouth rehabilitation, smile makeovers etc.
- Wellness and spa therapies with mud and spring waters
- Patient centric care system with 360 integrated experience and 24/7 available medical travel consultants
- Five stars accommodation and rigorous sanitary protocols

➤ Romania offers unimaginable unique travel experiences, from the cosmopolite Black Sea atmosphere, to the medieval towns, and the modern and dynamic experiences from the capital

➤ The country is rich in well preserved natural beauties, history, arts and natural springs

➤ The countryside offers an unmatched cultural and culinary experience

➤ The UNESCO World Heritage Site in Romania includes seven cultural and two natural sites

➤ Romania ranks 4th in the July 2022 top of the countries with the best online reviews offered by tourists

➤ **Libearty Bear Sanctuary from Zarnesti** is the biggest brown bear sanctuary from Europe and has the largest surface in the world

➤ You can find the largest virgin forests in the Carpathian Mountains in Europe, home to over 400 unique mammal species, including the black goat

➤ Bucharest, the capital, is also called "Little Paris." The city's Arcul de Triumf was constructed after the Arc de Triomphe in Paris

15 years of tradition

PALMED (Patronage of Private Medical Services Providers) is considered to be the main national "voice" for lobbying and advocacy in Romania. Since its establishment in 2007, PALMED supports the interest of private providers of medical services in Romania and the patients' rights to quality medical services at affordable prices.

The PALMED vision

To be recognized as a proactive non-governmental organization that brings a positive change in the Romanian medical system and that benefits from the unity of interests of all its members, both nationally and internationally, always focusing on the patients' needs.

The PALMED mission

Through permanent collaboration and constructive dialogue with all relevant institutions and organizations, PALMED aims to achieve and maintain excellence in medical services for the benefit of the community, with an emphasis on service quality, ethics and high standards of professionalism.

The PALMED values

Trust. Integrity. Transparency.
Professionalism. Respect. Unity.
Stability

All our actions are predictable and long term, as we aim at building up strong and trustworthy relations with our members that lead to the achievement of our objectives.

PALMED's goals are both member centric and patient centric. Thus, among the most important objectives is the promotion of fair competition between private providers of medical services, but also ensuring quick access of clients to medical services, with a fair price-quality ratio.

PALMED members contribute, through the social initiatives carried out, to the improvement of the medical system in Romania by developing health services and by training the theoretical and practical skills of the medical personnel.

www.palmed-patronat.ro

Patient centric

Assuring patients that they are empowered with personal choice and have easy access to healthcare services with a fair quality-price ratio. Also, through developing educational platforms for the general population, our members bring their contribution to education, and improve prevention for the wellbeing of all patients.

Awareness campaigns

In order to make a difference, in the latest years, our medical members have successfully led 73 prevention campaigns consisting of: campaigns against cancer, campaigns to educate and encourage preventive behavior in healthcare, cancer detection campaigns or addressing other medical conditions, dental prevention fairs, campaigns to prevent dental problems in schools and kindergartens.

DENT ESTET
The Leading Dental Centers of Romania

National Network, Romania

S

S

Step confidently into the innovative universe of **DENT ESTET clinics**, where digitalization refines the medical act, to offer you a unique experience. The dental health of our patients has been our priority **for 23 years**, that's why we constantly invest in training our medical team, in technology and education.

DENT ESTET group is the most complex dental network in Romania with **more than 200,000 patients** treated, with 16 dental clinics in Bucharest, Timișoara, Sibiu, Brasov, Ploiesti, Craiova, Cluj-Napoca, Oradea and Arad, 8 digital radiology integrated centers, the first and the only Intensive Care department in a dental clinic in Romania, with a medical team of 167 internationally certified doctors, 9 Future Smile Design photo studios, 7 psychology rooms and a unique educational medical management national program.

Moreover, since 2020, we rewrite the excellence in Romanian dentistry together with the remarkable **Prof. Paulo Maló DDS PhD**, a prominent personality who has greatly influenced modern dentistry worldwide. Through the **Advanced Same Day Dental Implant System** (All-on-4® by Nobel Biocare™) we are making possible the treatment of dental cases that seemed untreatable, needed invasive procedures or an extensive healing time.

What makes us special?

Alongside modern technologies like **ModJaw™ 4D**, **Waterlase - Laser Dentistry®** and dedicated divisions - **Straumann® Excellence Center**, **ASPEN CAD-CAM Dental Laboratory**, we build unique experiences for our patients, great connections and **smiles that conquer the world!**

DENTA CLINIC

Râmnicu Vâlcea, Romania

Denta Clinic is the first private dental hospital in the Oltenia area, Romania. In the last 13 years of practice, we have transformed the smiles of our patients without compromising the quality of the medical act and of the dental works.

Our mission is to provide the best dental services in a relaxed, comfortable atmosphere, designed to exceed patients' expectations.

We perform full mouth rehabilitation in a single day by using top technologies, inserting implants and temporary teeth using the SKY Fast&Fixed system, zygomatic implants, procedures performed under sedation and assisted by an anesthesiologist.

Patients are offered the possibility of accommodation, transportation from/to the airport, support for the necessary laboratory analyzes before the interventions, CT/Rx etc.

In providing the best experience, we also use the latest digital technologies, such as the PRGF centrifuge, dental laser, intraoral scanning, to make sure that the final smile is how the patient wants it.

Dr. Leahu Dental Clinics

**Bucharest, Pitești, Timișoara, Turda, Constanța, Oradea, Iași,
Sibiu, Galați, Ploiești, Cluj-Napoca, Craiova and Brașov, Romania**

Dr. Leahu Dental Clinics represents the most extensive network in the Romanian dentistry industry, being present in 13 cities in Romania (Bucharest, Pitești, Timișoara, Turda, Constanța, Oradea, Iași, Sibiu, Galați, Ploiești, Cluj-Napoca, Craiova and Brașov).

It has 169 dental practices and a fully digitized dental technique laboratory, and each clinic integrates at least one digital dental radiology center.

Dr. Leahu Dental Clinics provides a full range of dental treatments and the achievement of treatment plans in a limited number of sessions, doctors specialized in all branches of dentistry, the latest technology and quality materials according to European standards.

The medical team has successfully performed over 2,500 cases with the „fixed teeth in 24 hours” technique, over 43,000 dental implants inserted and 52,000 crowns and dental veneers applied. The range of dental services covers any age category, from the first tooth.

At the Dr. Leahu Dental Clinics, patients who want to benefit from complex dental implant treatments have access to digitized, fast and safe implantology services. The „Fixed Teeth in 24 Hours” system is a modern method of total tooth reconstruction, which is addressed to patients without teeth or with compromised teeth that can no longer be “saved, but also to wearers of mobile dentures.

Ivertumm

Suceava, Romania

Ivertumm is a new chain of dental clinics with a team of dentists with over 25 years of experience that offer premium dental services. Our clinics have well defined work and safety protocols, and the patients benefit from predictable dental treatments performed at high quality standards.

The clinic is fully equipped with modern technologies so that the patients benefit from complex dental rehabilitations in the same place.

The medical team is coordinated by dr. Ovidiu Lungu specialized in dental implantology and oral reconstructions with dental implants and hybrid dental implants.

The quality of the dental works, the extensive experience in the field, and the short period of time for the intervention are three of the many reasons why patients with severe dental problems choose the expertise of the Ivertumm medical team.

Junior&Family Dental Center

Bucharest, Timișoara, Iași, Romania

Junior&Family Dental Center has been offering integrated dental services for more than 9 years, through a network of four dental clinics of its own in Iași, Bucharest and Timișoara.

As a family concept clinic, we offer treatments to all patients, regardless of age, and cover the entire area of dental specialities.

The team has 30 medical professionals with a multidisciplinary approach to solve all the patients' dental problems.

The major advantage of the Junior & Family Dental Center clinics is its own dental laboratory - Drăghici Dental, being one of the largest in Romania, with over 15 years of experience. Thus, our patients benefit from prosthetic works performed with high-quality technology and in the shortest possible time.

LaurusMedical

**Bucharest, Bacău, Buzău, Cluj-Napoca, Deva, Focșani, Galați, Ploiești
Pitești, Suceava, Romania**

LaurusMedical, the network of medical clinics that currently holds 10 national branches, is the Romanian medical market player acknowledged as the leader in the fields of proctology, phlebology and dermatology.

LaurusMedical stands apart from the other private medical clinics through the modern approach of the medical clinics, fostered by the state-of-the-art equipment, offering minimally invasive treatment alternatives that do not suppose surgery, hospital admission, medical leaves or bed rest.

Out of our desire to improve our patients' medical condition and eliminate physical suffering and discomfort, Laurus Medical has introduced two top techniques: endo venous laser treatment for varicose veins and laser treatment for hemorrhoids. Another important technique to mention is the MBST Technology-Magnetic Resonance Therapy, for the treatment of joints and osteoporosis disorders.

In addition to the specialties that consecrated Laurus Medical as one of the key players on the private service market in Romania, the new clinic in Buzau for instance, covers fields such as: gastroenterology, dermatology, cardiology, obstetrics gynecology, urology, as well as proctology and phlebology.

Maxilomed

Oradea, Romania

MaxiloMED's goal is to be the best. We understood that for this is necessary to have a team with a high degree of specialization that used state-of-the-art equipment. Doctors of our team are highly specialized in all areas of dental medicine starting with oral and maxillofacial surgery, dental implants, prosthetic dentistry, root canal treatment and so on. Our team has an average experience of more than 10 years and is composed of university professors, and also of doctors with scientific activity and key opinion leaders in their field of expertise.

The clinic's equipment is of the latest generation, and their purpose is to obtain a safe and predictable treatment. The clinic has CB-CT, intraoral scanner, dental laser as well as other equipment necessary to perform a multidisciplinary treatment, in the shortest time with maximum comfort for the patient.

MedLife Hospitals

National Network, Romania

We own the largest and most complex network of private hospitals in Romania. With 15 hospital units, counting 981 beds and 39 operating rooms, thousands of doctors, nurses, and other support personnel, we strive to make everything possible today and every day.

For over 26 years, we have been looking for different solutions for interventions, implants, all medical treatments and recovery to help our patients return to their passions, their lifestyle and their rhythm of life.

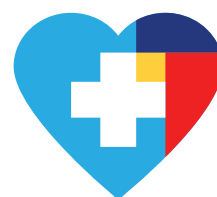

You know you're in a MedLife hospital when you hear our care in tune with your hopes, our science in unison with your strength, creating the music of a better tomorrow.

You are in excellent hands.
MedLife's robotic surgery department operates with Da Vinci Xi, a state-of-the-art robot.

Our results are seen in our patients' wellbeing, in the last 5 years, in our hospitals have been treated over 400.000 patients.

We offer the safest surgical intervention and with the help of this revolutionary robot, doctors solve very complex cases safely, cases that, sometimes, are impossible to be solved by classical surgery or conventional laparoscopy, with fewer complications and better results for the patient.

MedLive - The online MedLife clinic

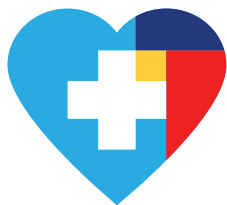

National Network, Romania

Wherever you are, you have your doctor with you. MedLive, the MedLife online clinic, is that place where you enter with a click and feel that you are understood, respected, treated with empathy and care, the place where you regain your confidence and hope for tomorrow.

You have access to specialist consultations, no matter where you are, by phone, tablet or laptop. An online appointment lasts as long as an appointment in any medical facility, approximately 20 minutes, and involves a discussion with the medical specialist to create an anamnesis and ask questions about your concerns and give you recommendations for further investigations, if necessary the case.

Also, MedLive can be a resourceful tool for second opinion for a specific medical problem.

MedLife

Scan me

Advantages of telemedicine

Fast access

Online consultations can be done regardless the distance between the doctor and the patient, without waisting time towards the doctor's office, transport expenses, waiting time at the office door, fatigue and stress (especially in the case of patients who are difficult to transport)

Ensures monitoring in chronic diseases

Patients with diabetes, bronchial asthma, heart disease, autoimmune or mental diseases, who have to make frequent trips to the doctor, can replace at least part of the regular consultations with online meetings with the attending physician;

Medical prescription

Following an online consultation, the doctor can recommend OTC medication (dispensed by pharmacies without a medical prescription) or medication that does not contain substances that are prescribed on special forms.

Monza Hospital

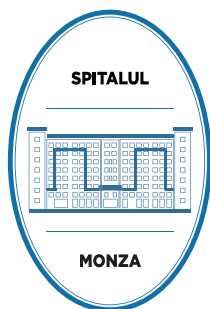

Bucharest, Romania

Monza Hospital is specialized in performing complex surgical interventions and in providing high performance integrated medical services. The experience and competence of the medical team are obtained through internships carried out in large university centers in Romania and abroad, but also through the complex cases they have faced.

Monza Hospital has the best performing private cardiovascular surgery center in Romania (Cardiac Center). The cardiovascular surgery department is made up of several surgical teams, which are specialized in the minimally invasive treatment of cardiovascular diseases. The Cardiac Center includes all heart specialties in one place and provides integrated diagnostic, treatment and rehabilitation services.

From a technological point of view, Monza Hospital is a reference center in Eastern Europe in terms of being equipped with state-of-the-art medical equipment. At Brain Institute from Monza Hospital, doctors perform spinal surgery with the help of Mazor X Robot, a revolutionary robotic guidance system that can currently be found only in 8 centers across Europe.

Open Design

Alba Iulia, Aiud, Romania

Open Design Dental Clinic is about work, ambition and innovation in dental health and dental aesthetics. Our mission at **Open Design** is to provide a complete experience, at very high standards for those who see in their teeth an extension of their own personality and lifestyle.

Located in the heart of Romania, in Alba Iulia, Open Design brings together more than **12 years of experience in dentistry together with specialized doctors in implantology, prosthodontics, periodontology, orthodontics and dental aesthetics**, so that we can solve advanced cases of dental rehabilitation that provide both functionality and aesthetics of the denture.

Open Design Dental Clinic offers solutions for complete dental rehabilitation with All-on-4 and All-on-6 treatment, combined with premium Straumann and Neodent by Straumann implants, that offer the advantage of having fixed temporary teeth in less than one day. This is possible with the help of our in-house dental laboratory and the digital equipment that we use.

At Open Design Dental Clinic, technology goes hand in hand with continuous learning and enthusiasm – we unite with passion and honesty for the smiles of our patients, regardless of age, and we solve all dental problems in one place.

OZONO

Iași, Romania

Ozono Clinic is a premium dental clinic in Iași, the medical capital of the Romanian province, Moldova, recognized for its elite medical team, the quality of doctor-patient interaction, the unique design and the high-performance equipment available for treating patients.

The OZONO medical experience is based on expertise, innovation and cutting-edge technology, great doctor-patient communication and multidisciplinary approach, which means that every case, regardless the complexity, can be successfully treated, and the patient benefits from a pleasant experience with a minimum number of visits.

We have expertise in full mouth rehabilitation in one day, and we perform all the oral restorations with premium dental implants from worldwide renowned producers.

All the interventions are performed in a specific operating room, accordingly equipped and supervised by a team of experienced dentists, anesthesiologists and dental nurses. By using conscious sedation in implantological interventions, we make sure to provide maximum safety for the patient and unparalleled comfort by suppressing the pain and stress of the intervention.

REGINA MARIA

Medical Network

National Network, Romania

The Private Healthcare Network is market leader in terms of the quality of medical services, being the only medical network in Europe with 14 international accreditations that testify the level of excellence in our patient care and safety.

The 14 accreditations are awarded by international institutions, such as Joint Commission International – the leader in global health care accreditation & quality improvement, and Surgical Review Corporation, following a thorough evaluation of over 240 standards and 1000 criteria.

Established in 1995, REGINA MARIA is also one of the largest healthcare providers in Romania, with 7 hospitals and a network of 500 clinics in all major cities across the country. REGINA MARIA covers any medical need, from robotic surgery – being the only provider with three state-of-the-art DaVinci surgical robots, to genetic testing and in vitro fertilization (IVF).

Check-ups and doctor appointments can also be done online, through the Virtual Clinic telemedicine platform.

6 million patients have been treated so far by REGINA MARIA's doctors, whose reviews – given by patients following their appointments – are published online, on the company's website.

Sf. Constantin Hospital

Braşov, Romania

Sf. (Saint) Constantin Hospital is a multi-specialized Hospital, founded in 2010, located in the central area of Braşov. At Sf. Constantin Hospital you will benefit from the modern facilities and full-time expert staff. You are offered high quality, ISO 9001 certified medical services and rooms for continuous and day hospitalization, totaling 150 beds.

In the more than 10 years of activity, Sf. Constantin Hospital has managed to position itself in the private medical world through complex surgeries performed, through the multidisciplinary medical team and by international recognition of implemented hygiene standards.

Sf. Constantin Hospital in Brasov has distinguished itself in the Romanian medical world as a promoter of minimally invasive surgery and new technologies. Numerous interventions were performed for the first time in the country. We are currently performing using the LESS technique (transomblical surgery without scars), but also a multitude of standard or 3D laparoscopy interventions, with an emphasis on obesity surgery and colorectal surgery are among the current interventions of the hospital.

Sf. Constantin Hospital offers patients quality medical services, in a safe and comfortable environment, differentiating itself from other traditional hospitals in Romania.

"PROFESSOR GILLES MENTHA" KIDNEY TRANSPLANT CENTER is the only center in Eastern Europe that performs daVinci sampling and transplantation. The kidney transplant is performed from a related living compatible (identical or compatible blood group) donor (grade I or II).

Vraja Mării Medical Spa Center

Eforie Sud, Romania

Founded in 2010, Vraja Mării Medical Recovery Spa Center by the Park in Eforie Sud, Constanța, had the idea to use at its full the healthy factors from the specific area like the therapeutic mud and water from Techirghiol, as an extra benefit for the medical procedures performed within the clinic.

For the comfort of the guests, the medical center offers high standards accommodation, with 137 available beds in 5 pavilions. The location integrates all the necessary facilities for an optimum experience of the guests, and provides, along with the treatment base, a restaurant, with terrace, recreation room with pool table, outdoor pool and a beautiful garden courtyard.

Within the treatment base, patients can benefit from the following procedures: mud baths, herbal baths, mud and paraffin wraps, galvanic baths, underwater shower, magnetotherapy, laser therapy, electro-physiotherapy, massage, physical therapy, hydrotherapy, galvanotherapy, ozone therapy, ozone sauna, ultrasound, curative programs (recovery/postnatal physiotherapy, infertility relief), saline therapy, TECAR therapy, osteopathy, hyperbaric oxygen therapy.

All the procedures are performed by an experienced medical team with over 80 professionals trained to treasure health and to offer the best available treatments.

During the warm seasons, patients at the Vraja Mării by The Park treatment base also have access to our private beach where they can enjoy sapropelic mud therapies, physical therapy, electrical procedures, massage and ozone sauna and sun baths that help them stay healthy.
